

Receiver PWM output calculator

Cut out. Fix disc onto drum. The guide circle is visible through the paper.
 Put drum on servo, no need to fix. Hold servo upright.
 Connect servo to receiver channel. Use some object to point to zero.
 Operate joystick over full travel.
 Note number of turns and angle for each channel below

Servo make/model

Transmitter make/model

Receiver make/model

Channel	No of Turns	+ angle	Total Degrees
1			
2			
3			
4			
5
